

Newsprint Watercolor Hearts

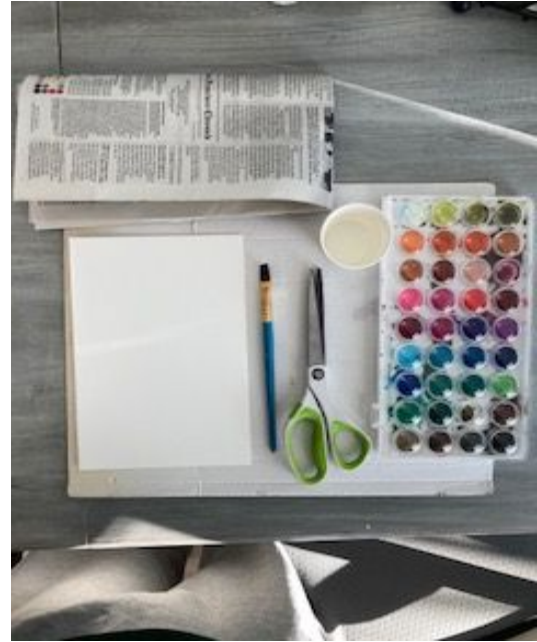

Valentine's Day Art

Step 1: Prepare your supplies

For this project you will need:

- Watercolor paper
- Watercolors
- Scissors
- Glue or glue stick
- Paint brush
- Water
- Newspaper

Step 2: Paint your watercolor paper

Using your brush, water, and watercolors, paint a variety of colors on your watercolor paper. You can use a full sheet or a half-sheet of paper.

Step 3: Cut out your newspaper heart

Use your scissors to cut out a heart from your newspaper that will fit on your paper. You can fold your newspaper to make your heart symmetrical.

Step 4: Paint your heart

Use your watercolors, water, and brush to paint your heart with colors that are different from what you used on your paper. This will help your heart pop on its background!

Step 5: Glue your heart to the background

After your paper and heart dry, use your glue or glue stick to attach your heart to your paper. You may need to put your project under a heavy book to help it stick without curling on the edges.
