# Thumbprint Valentines

— Valentine's Day Art —

---

---

# Step 1: Gather your supplies

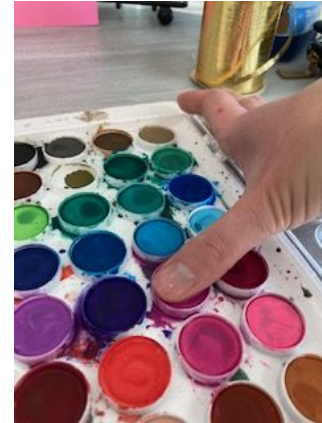

For this project you will need:

- Small piece of paper (watercolor or regular white paper)
- Paints (watercolor, acrylic, or what you have)
- Black marker
- Water (if using watercolors)

## Step 2: Pick your color

For this project you will be putting paint on your thumb or one of your fingers. Pick a color and dip your digit! If you are using watercolors, wet your finger or thumb first.

## Step 3: Make your prints

Center your painted finger or thumb over your paper. Turn your finger to an angle and make a print. Then angle your finger the other way and connect the bottoms of your prints to make a heart.

## Step 4: Add limbs and a face

When your paint is dry, add a face, arms, and legs to your heart creature. Be creative with your art!

## Step 5: Add a special message

Use your black marker to add a special message to your valentine!
